

DiagNano™ TOP CdSeTe/ZnS Quantum Dots, 680 nm

Cat.No: DNP-X170

DESCRIPTION

Description	CdSeTe/ZnS Quantum Dots are core/shell fluorescent nanomaterials with CdSeTe as the core and ZnS as the shell, stabilized with TOP (trioctylphosphine), 680 nm peak emission. FWHM (nm): ≤60 nm.
--------------------	---

PRODUCT INFORMATION

Functional Group	Trioctylphosphine
Emission Max	680 ±10 nm
Quantum Yield	≥ 60%

STORAGE AND SHIPPING

Storage Buffer	Toluene, Hexane or organic solvent
Storage	Store product away from direct sunlight at 4°C. Do NOT freeze.
